2015 Cybersecurity Innovation Forum

Security Automation - Trusted Computing - Information Sharing

The 2015 Cybersecurity Innovation Forum is a three-day event hosted by the National Institute of Standards and Technology that will be held **September 9 – 11, 2015** at the **Walter E. Washington Convention Center** in **Washington, D.C**.

The forum is being planned with participation from the Department of Homeland Security and the National Security Agency, and will include presentations and demonstrations about current activities, programs in development, and research projects that focus on government and industry solutions for addressing cybersecurity challenges.

Goal

The Cybersecurity Innovation Forum will bring government and industry together to focus on current, emerging, and future challenges, technologies, projects, solutions, and research in trusted computing, security automation, and information sharing.

Agenda

The three day forum will comprise of four tracks:

- Security Automation
- Trusted Computing
- Information Sharing
- Cybersecurity Research

Audience

The target audience includes consumers, producers, researchers, and educators of security automation, trusted computing, and information sharing technologies and services.

Industry Expo

In conjunction with the forum, there will be an Industry Expo on Wednesday, September 9 and Thursday, September 10. Additional information concerning exhibiting or sponsorship opportunities will be released in the near future.
